

# LET'S RECYCLE!

Welcome to our EcoPills series!

*In this pill, we explore how we can make a difference in waste collection and how every small gesture can contribute to a cleaner and more sustainable environment.*

# WHAT IS WASTE SORTING?

Separate waste collection is the system in which waste is divided according to the material it is made of, so it can then be recycled or disposed of properly.

# WHY IS IMPORTANT TO SEPARATE WASTE?

Separating waste is important because it allows us to recover raw materials, reduce pollution, and limit the amount of waste sent to landfills or incinerators, thus helping to protect the environment and support the sustainability of our territory.

# WHO MANAGE WASTE COLLECTION IN OUR MUNICIPALITY?

The waste collection and disposal service in our Municipality is managed by **Aprica S.p.A. – GRUPPO A2A**

To learn more about the company, you can visit their website.

# HOW WASTE COLLECTION WORKS IN OUR MUNICIPALITY

In our town, collection is organized **door-to-door**, according to a weekly schedule:

- **Monday** → organic waste, plastic, and paper
- **Wednesday** → non-recyclable waste
- **Friday** → organic waste
- **Saturday** (every 15 days) → glass and cans

## THE CALENDAR

MONDAY  
FRIDAY

WEDNESDAY

MONDAY

MONDAY

SATURDAY  
every 15 days

Organic

Residual

Paper  
& cardboard

Plastic

Glass &  
cans

# WHAT GOES WHERE?

Organic waste (food scraps, peels, dirty paper napkins) must be placed in **biodegradable bags**.

Paper (newspapers, cardboard, boxes) must be collected neatly to allow easy recovery by the operators.

Glass and cans must also be collected neatly.

Plastic (bottles, containers, packaging) goes into the **yellow bag**.

Everything that cannot be recycled goes into **non-recyclable waste**, in the **grey bag**.

It is forbidden to use **black or opaque bags** that do not allow the content to be seen, because they prevent checks on correct separation

Street bins in the town are intended only for small litter and cannot be used as garbage bins for household bags.

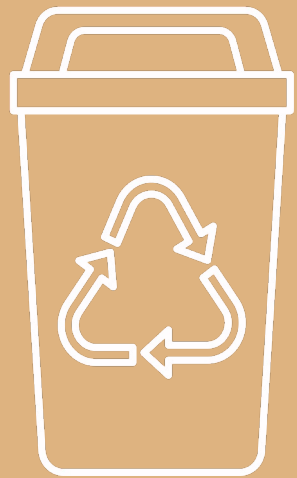

Failure to comply with these rules may result in **inspections and fines**.

## When to expose

Waste must be placed **before 7:00 a.m. on collection days**, in a clearly visible spot near your home.

## Waste bags and bins

Bags and bins for waste collection are distributed **on Saturday mornings** at the Town Hall (rear entrance). Supply is annual. If needed, you can contact the Technical Office.

## Calendar

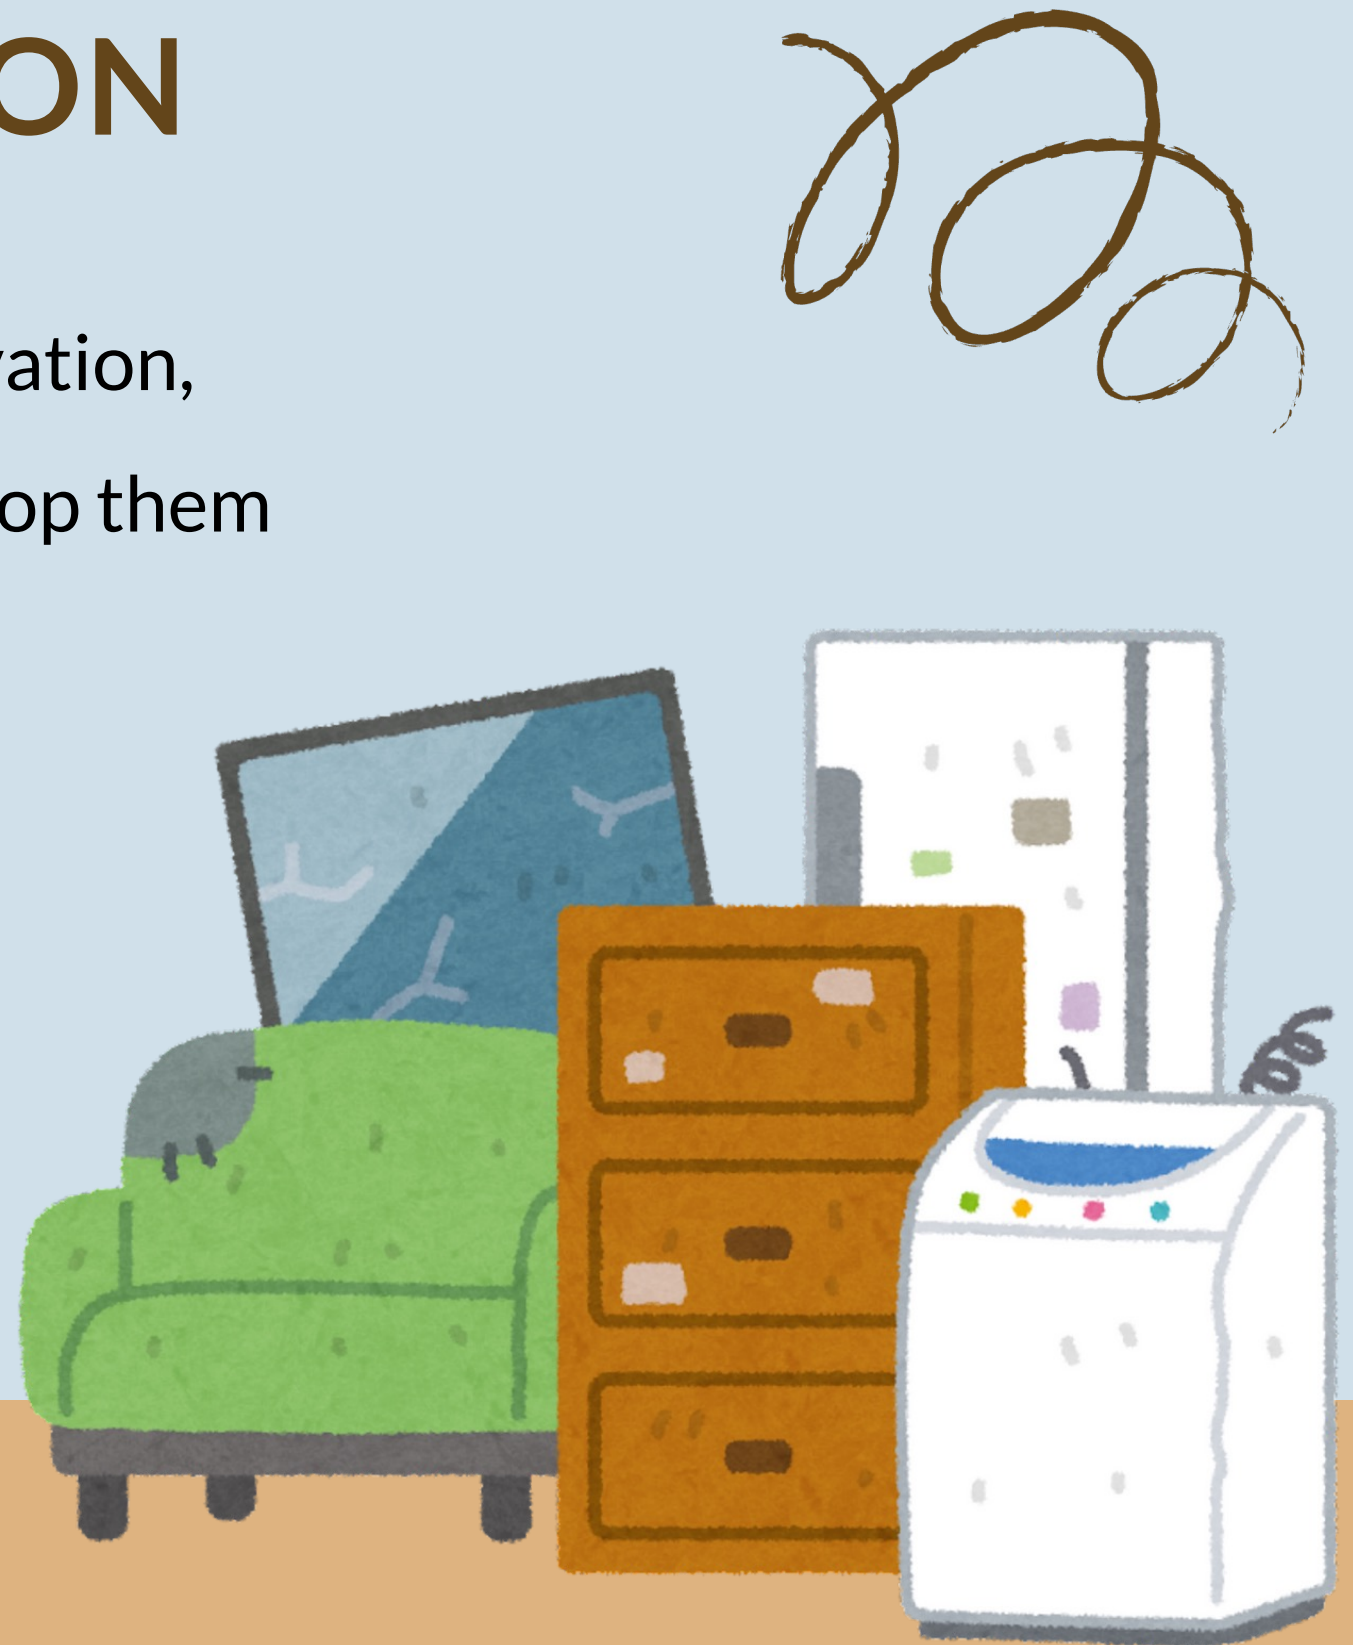

Calendars are distributed by post or can be requested from the Technical Office.

# BULKY WASTE COLLECTION

A home collection service is available upon reservation, and there's an eco-friendly area where you can drop them off directly.

The bulky waste collection service can be booked

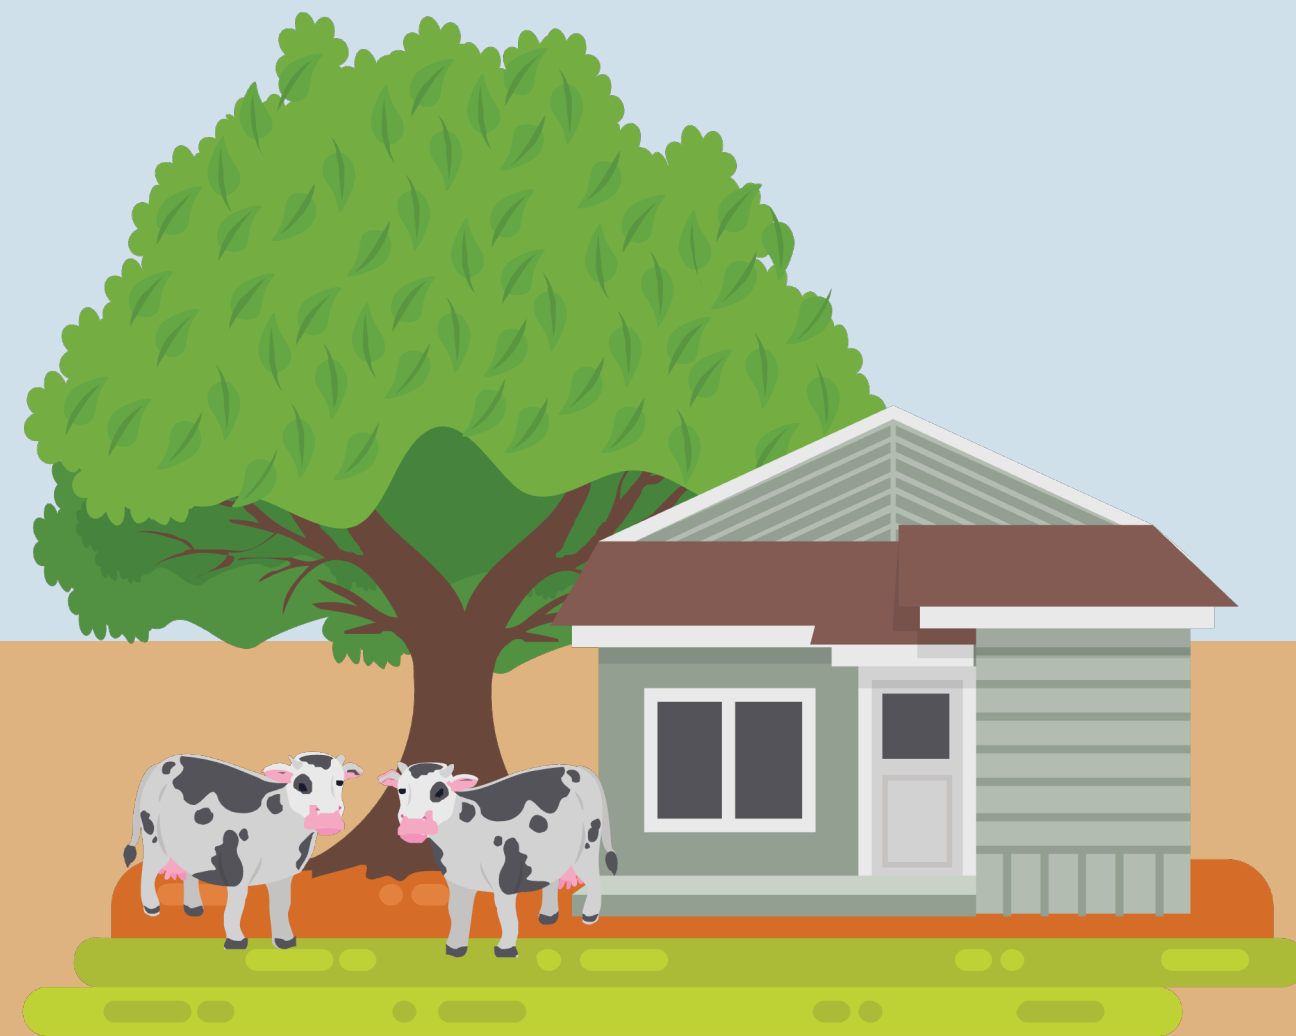

- by calling the toll-free number 800 437678
- using the PULlamo app
- requesting it through [apricaspa.it](http://apricaspa.it)

# FARMHOUSE AND SCATTERED SETTLEMENTS

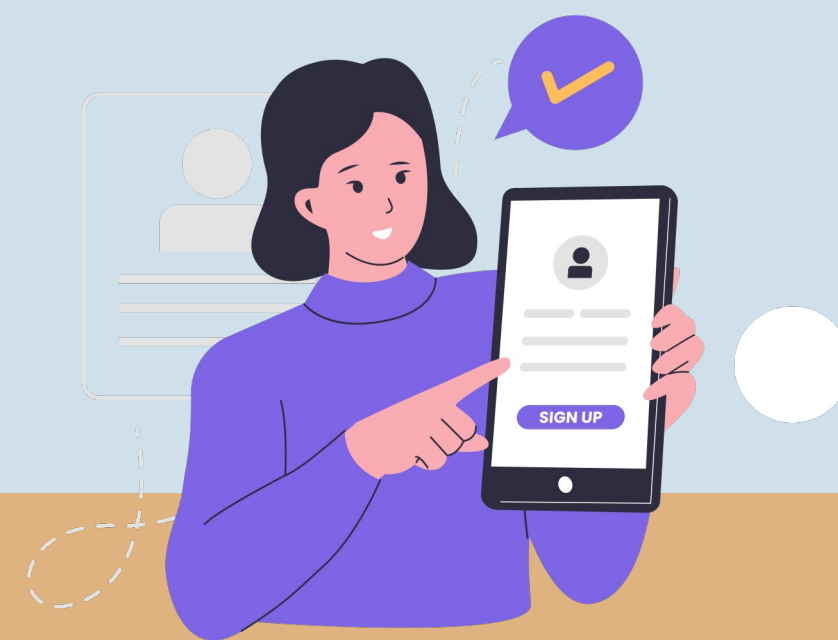

In some farmhouses within our territory, door-to-door collection is not active due to access difficulties for collection vehicles. In these cases, residents must take their waste to the collection center and receive a **30% reduction on the waste tax**.

For scattered settlements, organic waste collection is not carried out: residents must manage disposal on their own and receive a **10% reduction**.

# ANY QUESTIONS?

If you have any doubts or need more information, you can contact the municipal offices, visit the Municipality's website, or download the **PULlamo app**, which helps you identify the correct disposal method for every object.

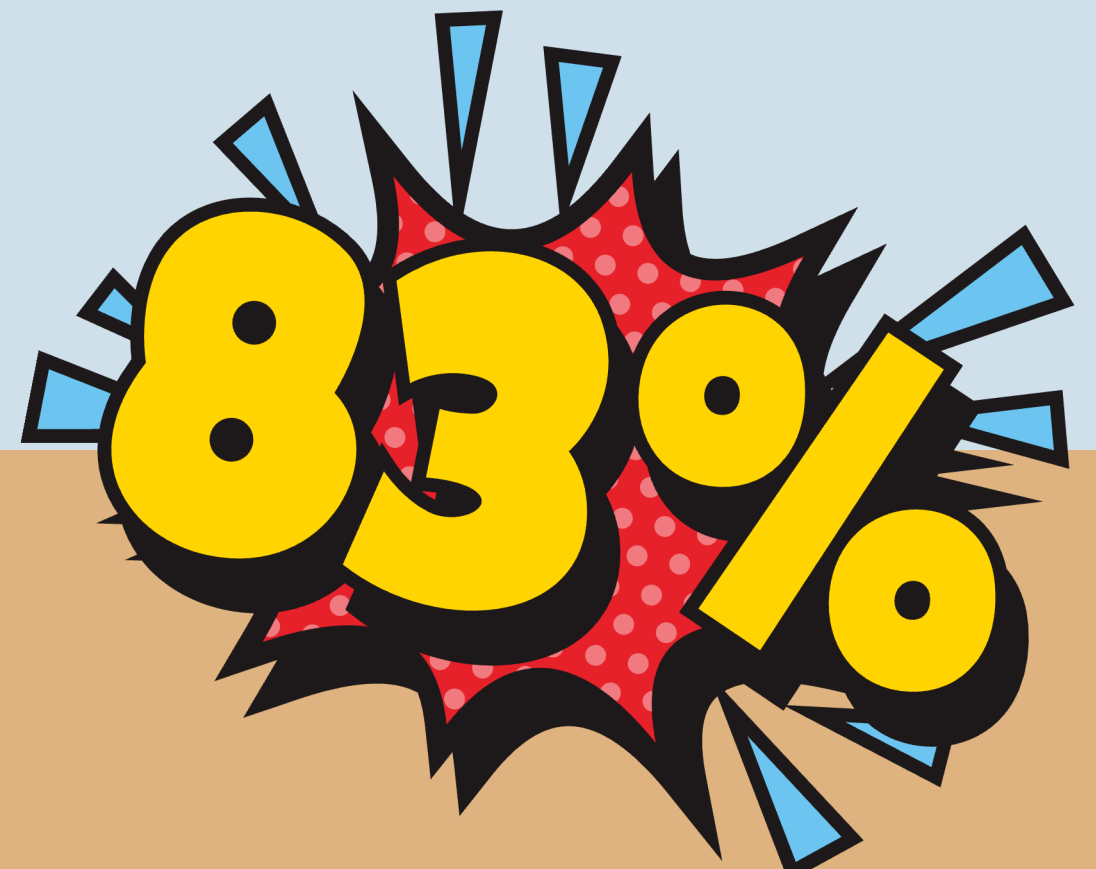

# AND NOW... LET'S GET THE NUMBERS OUT!

Thanks to everyone's commitment, our Municipality has achieved an important result: **83% of waste is recycled!**

It is a goal we can all be proud of, but together we can do even better.

Every time we sort waste properly, we avoid waste, protect the environment, and make our town cleaner and more beautiful.

**Everyone's contribution is essential. Let's keep it up!**
