

FOR A CLEAN VILLAGE

The cleanliness and care of our village are the result of constant work.

Comune di

San Rocco al Porto

EcoPills

STREET

Street cleaning is done once a week, on Tuesdays

To facilitate cleaning activities, we ask for the cooperation of residents: whenever possible, please avoid leaving cars parked along the streets, so that cleaning operations can be more effective.

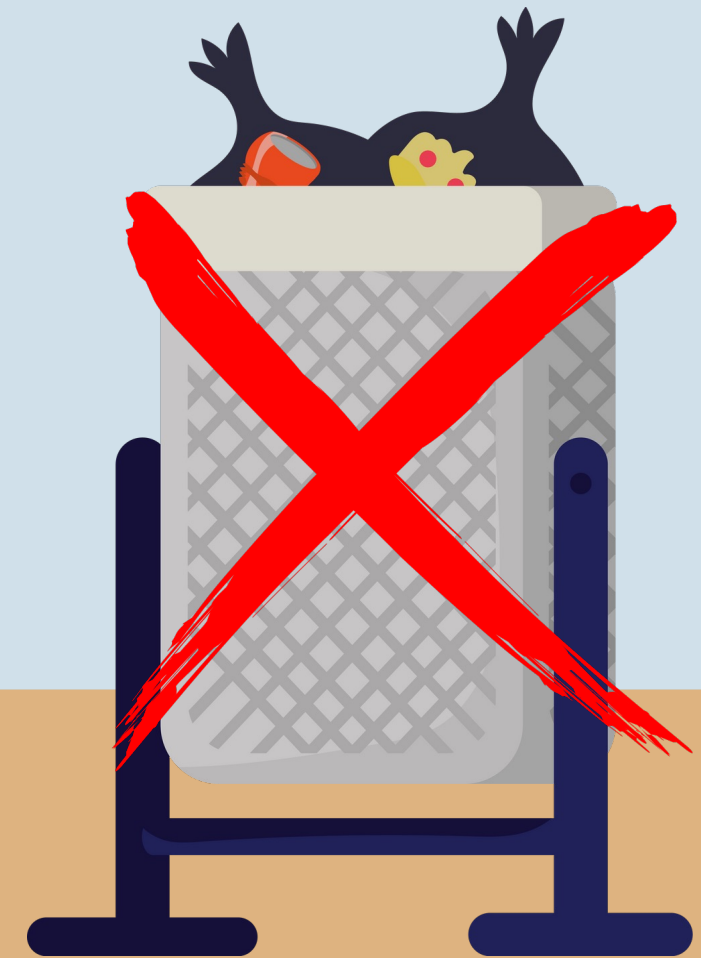

STREET BINS

Street bins are emptied twice a week.

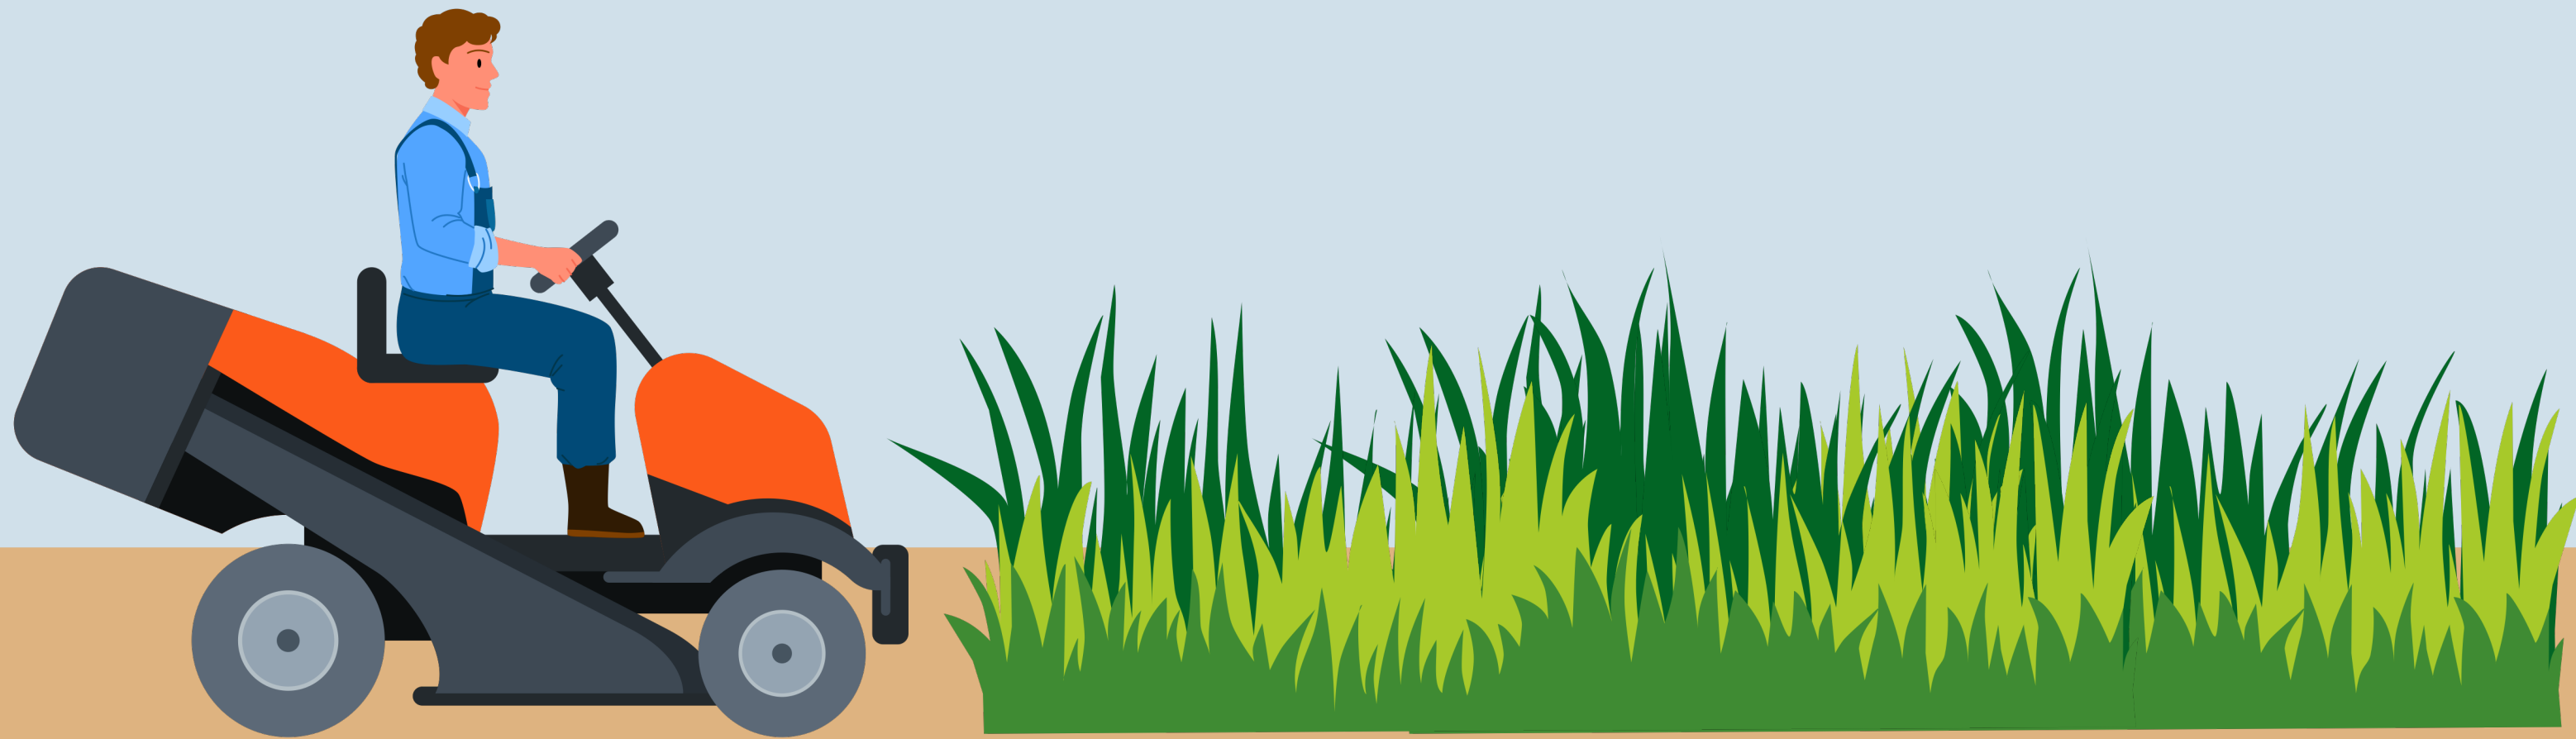

Please remember that the street bins are intended only for the collection of small waste and cannot be used as containers for household waste bags.

Failure to comply with these rules may result in inspections and fines.

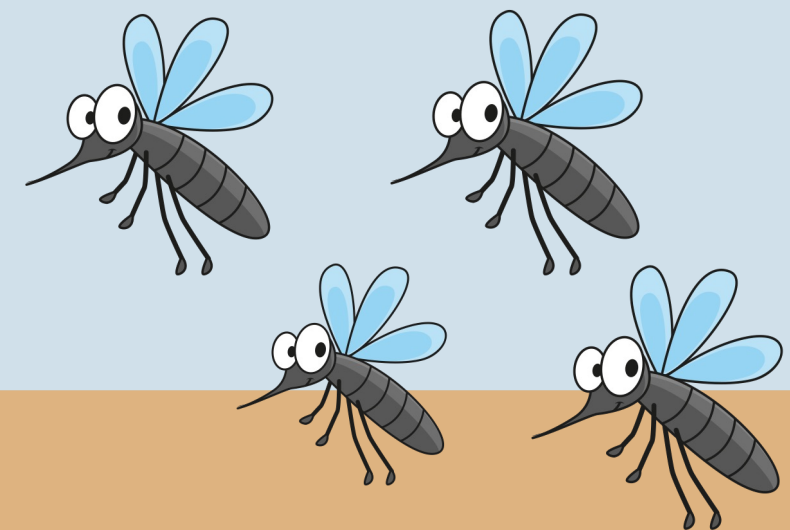

MUNICIPAL PARKS AND GARDENS

Grass cutting in municipal parks and gardens is carried out when the grass reaches a height between 8 and 15 centimeters, while roadside mowing is scheduled five times a year.

DISINFESTATION

Environmental protection activities also include regular pest control against mosquitoes and other parasites, as well as the installation and monitoring of rodent traps placed in various areas of the village.

A GREENER PLACE

In recent years, new trees have been planted on Via Gramsci and in the school garden to make our village greener and more welcoming.
